Because of the new directive regarding not converting carton fixtures to package fixtures if store has less than 16' of carton fixtures, several stores have been already prepped which should not have been. The following Kmart stores need to have the 4' area that was prepped be refitted with shelves/carton fixtures.

Sorry for the confusion and extra work this change has caused. Hopefully the rest of the reset will go smoothly. If you have any questions please contact me. My voicemail number is 840947.
